

# BUFFALO ROSE

Selected quotes for the Fleetwood Mac of Appalachia

"Their sound is intoxicating - the combination of their tight string band rhythm and their supple harmonies."  
- John Platt, New Folk Initiative

"How can a band be loose and tight at the same time? Listen to Buffalo Rose for the answer. I flat love them."  
- Tom Paxton, folk music legend

"Anyone who has tried recording live knows how that process exposes imperfections, and doing so with a lone microphone requires tremendous preparation and careful attention to your performance within the band setting. But this young sextet is up to the task."

"The balancing act that the six musicians of Buffalo Rose achieve is something to be celebrated. The group match each other's energy both in instances of quiet tenderness and rich swells... that vocal blend not only sets the mood for the folk tunes but also makes those dynamic changes seem so fluid."
